## [Flying Motorbike](#)

July 3rd, 2006 by AI in [Vehicle Gadgets](#)

I always wanted a flying car but I suppose this will have to suffice, a flying [motorbike](#).

Known as the Super Sky Cycle, the flying helicopter can travel at 110 km per hour in the air and 100 km per hour in the ground. Conventional [bikes](#) are great at dodging through traffic jams, the Sky Cycle takes it one step further and can simply overtake above.
