FOR IMMEDIATE RELEASE

March 26, 2008

IT'S FOR REAL: FIRST "FLYING MOTORCYCLE" DEALERSHIPS FOR SALE

(BOYD, TX – March 26) For \$10,000 you can become a dealer and sell flying motorcycle kits and our other products, said Larry Neal, president of The Butterfly LLC. But only if you do it in April, 2008.

"For the first time in the history of aviation, a flying motorcycle has made it to the production stage," he said. "The Super Sky Cycle is the only fly-drive vehicle on the market worldwide."

The Super Sky Cycle is a lightweight, three-wheeled motorcycle with folding rotor blades, Neal said. "It fits in the family garage, drives down the road, and flies."

The production Super Sky Cycle has a Rotax four-stroke engine, front and rear disk brakes, and optional long, sleek wheel pants with Cadillac-style taillights, Neal said. Along with the new space age look comes a flight speed of over 100 mph.

"Thousands of people have seen me fly the Super Sky Cycle at air shows, and even more have seen the television news coverage," he said. "It's for real! It's affordable and safe to fly. People tell me this is an idea whose time has come."

Neal says he's offering non-exclusive dealerships in the U.S. for \$10,000, starting in April. After that, they'll cost \$3,000 more per month until they reach \$25,000 in September.

Asked why he is selling dealerships now, Neal said that there's going to be a transportation revolution in the next 20 years. The revolution is starting now, and pioneer dealers will help make fly/drive vehicles part of it.

"Buy a dealership in April, buy a Super Sky Cycle with some accessories for yourself and sell one to a friend, and you've got your money back," Neal said. Dealers make ten percent commission on their sales.

Neal said more information on investment and instructor-dealer opportunities is on his website at: www.thebutterflyllc.com
